in 4 Lovely Colors

Miniature **Roses** are hardy and easy to grow indoors and out. Originally grown in the East more than two centuries ago, they were taken to England from China or Japan in 1815, "lost" until early this century, when an American **Rose** grower found them grown in Holland as a curiosity and imported them to the U. S. Miniatures are replicas of full size garden **Roses**, 6- to 12-inch bushes with perfect tiny buds and bloom. They require only the same regular feeding and care as full size **Roses**.

Some people use them for edgings in the **Rose** garden, some put them in sunny rock garden spots. Children like them for doll-house gardens. They can be used indoors as pot plants in a sunny window. When shipped in dormant condition, they should be repotted in 3-inch or larger pots at 60° inside, and can be forced into bloom in six to eight weeks. If used indoors, they need a rest out-of-doors in the fall. Prune after blooming, as with regular **Roses**, and they will put out more buds.

Neosho

NURSERIES COMPANY

OWNING AND OPERATING OVER FIVE HUNDRED ACRES

NEOSHO-MISSOURI
PHONE RT-1

DEAR CUSTOMER:

Fifty years seems a long time, and it is a long time compared to your lifetime or mine, but Neosho Nurseries has been serving the public and its customers that long. In fact, a lady customer from northeast Oklahoma remarked to me last spring that she had purchased her first order 50 years ago! We cannot say that about many customers, but we do have a lot of good friends we have been able to serve for twenty-five or thirty years, and many of our employees have been here from thirty to forty-five years. It all adds up to 50 years of pleasant experience.

For our Golden Anniversary we have issued our finest catalog. We are holding prices down, and at the same time improving quality! In our 50th year we are going to send out the best nursery stock we have ever had or that you can buy anywhere! And all through the book we have listed 50th Anniversary offers—they are bargains worthy of your attention.

For Neosho Nurseries there is a great future ahead! The people to follow you and me will do big things, but we intend to make our 50th Anniversary year one of quality so our successors will have a hard time saying they have done a better job. I hope you will enjoy this big year with us.

"Yours for Growing Satisfaction"

NEOSHO NURSERIES COMPANY

Joseph B. Weston
President and General Manager

FREE GIFT TO YOU

If your order totals \$5.00 we will include a free gift, on your request only. Select **ONE**: Fruit Tree (Peach, Apple, or Cherry); Shrub (Our choice of large or small growing type); 2 Concord Grape; when the purchase is for bulbs only—10 Gladiolus.

STATE INSPECTED STOCK

All stock is thoroughly inspected by an authorized State Inspector to guarantee freedom from disease.

HOW TO ORDER All orders are F.O.B. Neosho unless otherwise specified. Terms are cash in full with order. If C.O.D. shipment is desired, the order must be accompanied with a 10% deposit. On all orders for less than \$10.00 full cash should accompany order. Order by catalog number, but write in variety also.

MINIMUM ORDER Because of increased handling costs we are unable to handle orders for less than \$2.50. If less than \$2.50 add 50c for handling charges and postage.

PARCEL POST SHIPMENTS Add 10% to cover postage on all orders shipped parcel post. Items measuring more than 100 inches in length and girth combined must be shipped express or freight and will come collect for transportation.

NEOSHO GUARANTEE

- Without any qualification, we guarantee you true-to-name stock. If any proves otherwise, we will replace it immediately without charge, or refund the purchase price.
- We guarantee the highest quality and we guarantee that your order will arrive in good condition. We only request that you examine the shipment carefully on arrival and if you have any complaints let us know within 10 days. If there is a complaint it will be cheerfully adjusted to your satisfaction and we will refund the purchase price or replace the stock as you prefer.
- If any stock that reaches you in good condition fails to grow, even though we have no responsibility for this failure, we will share your loss. We will replace any such stock that fails to grow at one-half price, if you report this by July 1st after planting.

RA-PID-GRO For Better Flowers, Better Lawns, Better Shrubs and Trees, Better Gardens

Here is a product that we would like to have everybody use. When planting, simply put 4 level teaspoonfuls of RA-PID-GRO in 1 gallon of water (8 level teaspoonfuls in 2 gallons of water, etc.). Soak the roots of Roses for 3 minutes. They will start much more quickly and bloom much sooner. Soak roots of shrubs for 3 minutes, roots of trees 4 minutes; just dip perennial roots for a second or two. Strawberries are dipped for just a second or two. Raspberry, Blackberry, Boysenberry, Grapes, Gooseberries and Currants are dipped for 1 minute. After dipping, plant right away, keeping all roots protected from sun and wind. When through planting, pour the solution around the newly planted stock. Then every 2 or 3 weeks, use RA-PID-GRO and you will get the best results. One pound makes 22 gallons of quick-acting fertilizer.

1 lb. \$1.30 2 lbs. \$2.50 5 lbs. \$4.75 10 lbs. \$9.00

GARDEN ITEMS

HYPNUM PEAT MOSS Furnishes life-giving high nitrogen humus. Excellent soil conditioner. A neutral peat moss activated with beneficial soil bacteria. Excellent top mulch. Weed free and odorless.

Climbing White Dawn

Climbing Gold Rush

Climbing New Dawn

NEOSHO CLIMBERS

Climbing **Roses**, with their long, strong stalks, make wonderful color accents, may be trained to bloom on fences, arbors, or arched trellis. They are beautiful for landscaping. We think the best supports for climbers are wood—but be sure the support is substantial; our climbers are sturdy, vigorous plants and you are making an investment of bloom for years to come.

163—CLIMBING WHITE DAWN. New, hardy, ever-blooming white climbing **Rose**. Flowers are double, snow-white, fragrant and produced from spring to frost. A vigorous grower with glossy foliage.

CLIMBING ROSE PRICES

Each \$ 1.40
6 for 7.50
12 for 13.75

157—CLIMBING GOLD RUSH. An everblooming climber with large, double blossoms of molten gold. Vigorous and hardy, one of the most reliable pillar **Roses**. Produces bloom on new wood. Fast growing in popularity.

158—CLIMBING NEW DAWN. The famous Dr. Van Fleet **Rose** in climbing form—the first ever-blooming climber developed. Fragrant, double, shell-pink flowers fading to a blush-pink. Long stems, trim pointed buds. It blooms from spring to frost. Hardy, vigorous plant.

Everblooming Paul's Scarlet

166—EVERBLOOMING PAUL'S SCARLET. A new strain, which gives a blaze of bloom in spring and fall—the most popular red **Rose**, with brilliant double blossoms in clusters on long stems. A real everbloomer, highly recommended.

160—CLIMBING CORAL PILLAR. Flowers are large, a brilliant blending of rose-pink, carmine, gold, and apricot. Hardly ever out of bloom from spring until frost. A pillar type, growing to 8 or 10 feet, it is striking for background or as a single accent plant.

Climbing Parade

Climbing High Noon

165—CLIMBING PARADE. (Pat. No. 1253). A great everblooming climber. In spring, covered with rosy red bloom, 4 to 5 inches in diameter. By fall a mass of bloom again on new shoots. Spicy fragrance.

Each \$2.50 3 for \$6.60

168—CLIMBING HIGH NOON. (Pat. No. 704). An exceptionally brilliant yellow climber of Hybrid Tea type with unfading blossoms throughout the season.

Each \$2.50 3 for \$6.60

Beautiful AZALEAS

AZALEAS. We have tried several different types of **Azaleas** here at Neosho and find the varieties listed are perfectly hardy in our Midwest weather conditions. **Azaleas** should be mulched with peat moss and fed with **Azalea** fertilizer (see below). They will do best if given some shade and protection from southwest winds and full afternoon sun. Don't cultivate with rake or hoe (roots are near the surface). Water frequently, particularly when in bloom.

Red, White and Pink Azalea Bloom

AZALEA COLLECTION

Cat. No. 810

One of each of the 4 **Azaleas** listed

All for Only \$7.50

79—AZALEA POUKHANENSIS. (See right). Found in Korea, named for the Korean mountain Poukhan. Hardest, earliest **Azalea**. Large, orchid-colored blossoms. Prices at right.

AZALEA FERTILIZER

A basic fertilizer for all acid-loving plants such as **Azaleas**, **Hydrangeas**, **Evergreens**. **Azaleas** are rewarding if you will apply one handful to each plant in April. Add to your order on the order blank.

5 lbs. \$0.75
10 lbs. 1.30

78—AZALEA, HINODEGIRI. Flowers brilliant red, produced so as to cover plant completely. Of dense, compact growth, makes close low hedge or background planting.

77—AZALEA, CORAL BELLS. (Not illustrated). Hardy plant with dark green foliage. Flowers are a clear pink with speckled throat.

80—AZALEA, SNOW. Hardy, dwarf plant with snow-white, double blooms and dark green evergreen leaves.

AZALEA PRICES

Each \$2.25 3 for \$6.00

All 3 for Only
\$3.25

Weigela Rosea

Weigela, Bristol Ruby

37—WEIGELA ROSEA. In May and June the well shaped bush is literally covered with hundreds of bright pink, trumpet-shaped flowers. Weigela like a moist soil, plenty of sun. They are easy to grow, reach a height of 6 to 8 feet.

18-24 in. Each 3 for
2- 3 ft. \$1.10 \$2.85
1.35 3.60

38—WEIGELA, BRISTOL RUBY. In the spring a solid mass of ruby-red, trumpet-shaped flowers and will often bloom intermittently all summer. Makes a wide shrub 6 to 8 feet tall and 6 feet across. Grows anywhere. One of the best.

18-24 in. Each 3 for
2- 3 ft. \$1.35 \$3.60
1.75 4.65

39—WEIGELA VANICEKI (Cardinal Shrub). Another improved red variety, most winter hardy. A shapely bush, 6 feet or so tall.

18-24 in. Each 3 for
2- 3 ft. \$1.25 \$3.35
1.50 3.95

Blue Lilac

Beauty Bush

49—BEAUTY BUSH (Kolkwitzia). Hardy, handsome flowering shrub from China. Upright in growth, with graceful arching branches covered in spring with bell-shaped pink flowers, deliciously fragrant. Has excellent foliage and looks well in groups or as an untrimmed hedge. Grows to 8 feet tall in any ordinary soil in sun or part shade.

18-24 in. Each 3 for
2- 3 ft. \$1.35 \$3.60
1.60 4.25

36—SNOWBALL. In late spring this old-fashioned but very popular shrub is covered with clusters of white flowers that look like giant snowballs. Foliage is a deep green, and the bush is hardy anywhere. Grows 12 to 15 feet tall.

18-24 in. Each 3 for
2- 3 ft. \$1.35 \$3.60
1.75 4.65

Snowball

Redbud Bloom

White Dogwood

Red Dogwood

CHEROKEE CHIEF

319—Outstanding red-flowering Dogwood. New tree with deep red blooms. Fall color bright scarlet shading to green, with bright red berries. Very hardy.

	Each	3 for

DOGWOOD ANNIVERSARY SPECIAL

Cat. No. 830

1 Pink Dogwood, 2-3 ft.	\$3.35
1 White Dogwood, 2-3 ft.	1.95
1 Redbud, 2-3 ft.	FREE

All 3 For \$5.30

Pink Dogwood

324—REDBUD. Slender, graceful tree that grows to 25 feet. Early in the spring, before the tree leaves, the branches are covered with clusters of small purplish pink bloom. Native to the mountains and hills of the Middle West and South, they are particularly beautiful in the Ozarks. Ours are nursery grown, and recommended for clumps in garden and lawn. Ornamental all year round.

NEOSHO SELECTED HEDGES

Hedges make beautiful borders and fences the friendly way. A fine Hedge gives you privacy, and adds to the neat appearance of your property. A Hedge planting is a long term investment, and we have selected the very best for you to choose from. For dependable green: **Privet**. For flowering Hedges, we recommend **Spirea** and **Tatarian Honeysuckle**. For winter color: **Red Barberry**.

Privet Hedge

303—AMUR RIVER NORTH PRIVET. Hardest of all **Privets**, standing 20 degrees below zero without damage. Can be trimmed to any height. Makes a dense hedge. Drops foliage in winter.

304—AMUR RIVER SOUTH PRIVET (Evergreen). Will retain foliage all winter here at Neosho in average winter. Fast grower, can be kept trimmed to any height. Most popular **Privet** in central Midwest.

Amur River North and South Prices

	10 for	25 for	50 for	100 for	250 for

441—**BOSTON IVY**. Most popular plant for covering brick, stone or wood. Clings to smoothest surface. Beautiful color in fall.

442—**ENGLISH IVY**. Beautiful dark green evergreen leaf. Clings to masonry if used on north or east side.

Each	3 for	10 for
\$0.75	\$1.95	\$5.75

Hall's Honeysuckle

CLEMATIS

Clematis comes from a Greek name meaning climbing plant. It is excellent for walls, trellises, latticed porch sides. Their wide delicate blossoms are as fragrant as small Gardenias. Clematis require light, well drained soil and full sun. Vines should be tied to their supports early in the season. Feed with Ra-Pid-Gro.

Red Clematis

VINES

Climbing Beauty

Every garden has a spot that a climbing **Vine** will beautify. **Ivy** softens bare lines, **Clematis** adds a note of showy color. And every garden has a shady spot where no grass will grow, but where **Vinca**, with its clean green leaves and big purple blossoms provides the perfect ground cover.

451—**VINCA MINOR** (Trailing Myrtle). Glistening evergreen leaf with tendrils that spread and carpet ground under shrubs or trees where it is too shady to grow grass. The purple flower is profuse and surprisingly large. A good ground holder recommended for places that have any tendency to wash.

Each	3 for	10 for	25 for
2-yr. No. 1	\$0.35	\$0.90	\$2.65 \$6.00

440—**BITTERSWEET**. Clusters of orange-scarlet berries, lovely winter bouquet when dried. Plant two for pollination.

Each	3 for
\$0.80	\$2.10

449—**SILVER LACE VINE**. Often grows 20 feet the first season. Thousands of fleecy white flowers in late summer.

Each	3 for
\$1.25	\$3.35

HONEYSUCKLE

444—**HALL'S HONEYSUCKLE** (Evergreen). Fragrant white and yellow flowers and attractive blue-green foliage which remains most of the winter. Grows anywhere.

512—Mixed

Columbine, McKana's Hybrid

HOW TO GROW PERENNIALS

Perennials are growing in popularity; they are wonderful in the small garden or the border planned for successive bloom, give you color from spring to fall. The ones we show you on these two pages are the finest we have grown, and we know they will give you gardening pleasure.

All **Perennials** do best if planted in well drained soil, with peat moss incorporated to assure humus. Feed during the growing season with **Ra-Pid-Gro**. Most **Perennials** respond to a sunny location, or light shade. All should be lightly mulched for the winter. Since **Perennials** make rapid growth, they need dividing (spring or fall) every two or three years.

PERENNIALS

In our 50 years of growing and selling plants, we have seen many new perennials developed. We carry them, and many of the old favorites, such as **Bleeding Heart**. Most popular last year was that delightful little plant, **Clove Pink**, hardy cousin of the **Carnation**, next to the **Rose**, America's favorite flower.

545—CLOVE PINKS. These spicy herbs with single red, white, and pink blooms are fine for sunny borders, rock gardens, edging borders. They like warm soil, winter well.

506—BALLOON FLOWER. A beautiful dwarf species with broad thick foliage and large, deep violet-blue flowers on 12-inch stems in great clusters throughout the entire summer. Plant in front of the border or use in the rock garden.

HIBISCUS. Hollyhock-like blooms on 4-foot stems.
536—PINK 537—RED

SWEET WILLIAM. Dense, rounded flower heads of 20 to 30 blooms. Dwarf growth habit. Hardy.

562—RED 563—PINK 564—WHITE 565—PURPLE

533—GAILLARDIA. Rich burgundy blooms tipped in gold. Large blooms on 3-ft. stems. Good summer bloomer.

538—LYTHRUM. Bushy plant, 3 feet tall with pink spikes all summer. Easy to grow. Bloom from July to September.

530—DAISY, PAINTED. Daisy-like flowers in red, pink, and white. Excellent cut flowers. Tall stemmed.

528—DAISY, SHASTA. Large, frilled, double white blossoms in June and July. Beautiful garden gem.

CARNATIONS. A delightful spicy fragrance. Double flowers all summer.
508—PINK 509—RED 510—YELLOW

Hardy PHLOX

BLOOMS FIRST YEAR — LOW COST BEAUTY

Plant in a well drained, sunny border. Set plants 10 inches apart. Spade deep and use **Ra-Pid-Gro**. Never let plants go to seed, (divide every three or four years to prevent crowding). Will grow to 3 feet. Hardy.

551—IRENE. One of the best cherry-red Phlox. Bronzy green foliage.

552—MARY LOUISE. The best white Phlox, with heads of purest white.

549—DAILY SKETCH. Lustrous, sparkling pink with deeper eye. Very large flowers.

553—ROYAL PURPLE. Rich shaded violet with deeper eye.

556—CAROLINE VANDENBERG. Beautiful blue-lavender.

557—SAN ANTONIO. Rich ruby-red. Large.

554—SALMON GLOW. Immense heads of rich salmon.

CULTURAL TIPS and HINTS

GENERAL

When buying plant material be sure you purchase varieties that will prove satisfactory; that will give you real pride each time you glance out your window or show them to your friends. Even if you feel your yard is completely planted, you may well find it worth while to discard some of the older plants and re-plant with newer distinctive plant material. We can assist you at NEOSHO in your landscape questions, just stop by the office or drop us a note. Remember all plants are LIVING, and they should be treated as such. Never allow plants to dry out, either before, during, or after planting. This is truly rule number one, and the largest single factor in plant mortality. Follow these simple tips and you will enjoy many pleasant years of enjoying your lovely plants.

PLANTING

Before actual planting, be certain the soil is ready for planting. If your soil is a heavy tight clay, the incorporation of Peat Moss as a humus builder is extremely important. Blend the Peat Moss into the soil, at least a spade depth, to assure good fiber root development. At planting time be certain the plants are pruned back properly. (See section on Pruning). As a general rule of thumb, all plants should be planted at approximately the same depth they were growing in the nursery. Balled and burlapped stock should be planted so the top of the burlap is covered, and the tree should be set a trifle lower than it stood in the nursery. Bare-rooted plants should have generous sized holes with the soil loosened in the bottom of the hole. After the soil is back-filled in around the roots, leave a saucer-like depression to retain water.

SPRAYING

Most plant diseases can be suppressed materially with good cultural and sanitation practices. By keeping plants healthy with adequate food, water and soil nutrients, the problem of insect infestations will be minimized. In most cases, all-purpose dusts or sprays will do a good job for insect control. If you are confronted with an unusual problem, feel free to consult us as we will be more than glad to assist you.

CULTIVATION and MULCHING

All plants, except Azaleas, will benefit from a frequent shallow cultivation. This will give you good weed control and will produce a dust mulch for moisture retention. Mulching is highly desirable for decorative purposes and is beneficial to plants. Mulch with a two or three-inch layer of Peat Moss for best results.

WATERING

Water all newly planted material liberally twice a week for the first year. Deep watering is important; so be sure the water penetrates the soil to the root zone. Normally once a week watering should be sufficient the second year. Plants will benefit from winter watering on days above freezing.

FERTILIZATION

At planting time most plants do not need a feeding of commercial fertilizer. A liquid solution of RA-PID-GRO for dipping the roots of bare-root plants is excellent and will get all plants off to a fast start. RA-PID-GRO feeding during the growing months is extremely beneficial as foliar and liquid feeding methods are quickly effective. If commercial fertilizers are used, be careful not to burn plant roots. All fertilization should be withheld after August so the wood will harden off before cold weather.

PRUNING

A common failure of newly transplanted nursery stock is due to the lack of proper pruning. When plants are dug, some of the feeding roots are cut off; therefore, it is necessary to compensate for the root loss. A good rule of thumb in this regard, is to remove approximately one-third of the top branches of the plants. When pruning, use good, sharp shears and make a clean cut. Do not leave stub ends and paint all cuts with a tree wound paint. Prune all flowering shrubs immediately after they finish blooming in order not to cut off blooming wood for next year.

Spic and Span

NEOSHO GLADIOLUS

By planting these inexpensive bulbs every two weeks through the spring you can have rich changing color from early summer to fall. **Gladiolus** make wonderful long-stemmed cut flowers in abundance, at little expense and care. They are known as a "fool-proof" flower.

668—**ROSE CHARM.** A sensational shrimp-pink.

669—**FLORENCE NIGHTINGALE.** Glistening ruffled white. Most outstanding.

670—**FRIENDSHIP.** Beautiful early rose with lighter throat. One of the best in recent years.

671—**LEIF ERICKSON.** Apricot-cream-yellow with deep orange-red blotch. Very unusual.

673—**SANS SOUCI.** Deep scarlet-red. A narrow creamy line on the lower petals seems to add to its beauty.

674—**SPIC AND SPAN.** Deep ruffled pink. Sweepstakes winner in many shows.

675—**KING LEAR.** Ruffled deep purple with slightly deeper throat.

676—**SPOTLIGHT.** Clear deep yellow with scarlet blotch.

NEOSHO STRAWBERRIES

Wild Strawberries were so natural to most parts of the United States that they were not really domesticated for gardens until about the first Fourth of July in 1776. A century later **Strawberries** developed in the Ozarks became an important part of the U. S. fruit crop, famous for firmness and sweetness. Last spring was a great berry season in our famous **Strawberry** section and our foundation stock should produce outstanding plants. Write for special quantity prices.

✓ **423—BLAKEMORE.** Extra early, bright red berry highly flavored and a tremendous yielder; self pollenizing. Easy to develop a full wide row the first season.

✓ **425—NEW ROBINSON.** Uniform, extra large, scarlet berries are solid red all the way through, with a delicious sweet flavor. Ripens just after Blakemore.

✓ **422—DUNLAP.** A deep glossy red, medium size berry of rich honeyed sweetness.

✓ **424—AROMA.** (Midseason). Large, luscious, sweet berries, very firm. Will ship 1,000 miles and arrive in good condition.

✓ **421—POCAHONTAS.** A new early bearing introduction by the U. S. Department of Agriculture, with large, dark red berries. Extra good plant maker and heavy producer. Excellent quality and high flavored.

✓ **426—ARMORE.** A Missouri University cross combining the better qualities of Aroma and Blakemore: Aroma quality and size and Blakemore plant making productiveness and drought resistance.

Luscious Fruits...

You don't need acres to grow your own fruit. Not when you plant Neosho Dwarf Trees. From a 12-foot tree it is easy to harvest these full size fruits—the same fruit you get on full size trees, and if you want to spray it is so easy! Put them in your garden or lawn. Plant with bud union at least two or three inches above the ground so variety scion will not root and make the

Dwarf Apple

DWARF APPLE TREES

These popular varieties have been dwarfed but produce the same fruit described on pages 42 and 43. Easily sprayed and harvested. A beautiful and valuable addition to any landscaping theme. Two varieties will insure better pollination and heavier crops.

NEOSHO Fine PEARS

215—BARTLETT. Bartlett quality sets the standard for all Pears. A good producer of delicious, fine grained fruit. Ripens about September 1st. Best conning Pear on the market.

218—LINCOLN. Extra large, good quality Pear that ripens in August. Blight resistant and especially recommended for the Midwest.

216—MAXINE. Large, beautiful golden yellow fruit, with delicious flavor. Extremely blight resistant. Snow-white, juicy flesh melts in your mouth.

217—JOHNSON. Beautiful blight resistant variety. Excellent for canning. Heavy bearer, with large golden fruit and white flesh. Fine new variety.

219—ORIENT. Enormous crops of yellow-red blush fruit with creamy white flesh. Blight resistant. Perfect for canning.

Bartlett

on DWARF TREES

tree a standard sized one. We recommend these Dwarf Fruit Trees for landscaping the small home because of their beauty in the spring, their shade and ornamental form, and their luscious fruit in the fall. In the last few years they have been growing in well deserved popularity in this area. Plant them 8 to 12 feet apart for best results.

Dwarf Elberta Peach

Dwarf Bartlett Pear

DWARF PEACH TREES

These varieties are grown on a rootstock that dwarfs the tree, but still they produce the same large, delicious fruit.

Pear is the fruit tree that will live for generations! And nothing tastes better than a ripe Pear picked in your own back yard. Use the new streptomycin sprays to prevent fire blight. Blossoming Pear trees are beautiful in the spring. They are best planted on the north, and like good drainage. Plant 20 feet apart. Two trees, alike or different varieties, planted near each other will both produce more heavily than if planted alone.

248—DWARF LEMON. Evergreen house plant that will grow to 2 feet high and live for years. Fruit is very edible and blossoms are extremely fragrant. Grow them in any sunny window, and plant outside in the summer if you wish.

NEOSHO'S Peach Trees

SOME PEACH HISTORY

We bud and propagate our own **Peach** trees by the thousands. One of our predecessors, on a plot of soil in what have been our growing grounds for three generations, first developed the famous J. H. Hale **Peach** nationally. This plot, described 50 years ago as "ideal soil in the center of the U. S." was selected by J. H. Hale himself. We have propagated the J. H. Hale ever since and offer it today.

Belle of Georgia

Peach Calendar

Maturity dates of **Peaches** vary according to locality and season from year to year. Normally Elberta ripens about August 10th in Neosho. Below is a list of our varieties beginning with Cardinal, which ripens a full six weeks ahead of Elberta. The others mature in the order of their listing. We are proud of our **Peach** trees; they are heavy plants, up to our rigid Neosho grade standards and well acclimated to our Midwest area. Plant several varieties this spring.

Cardinal	Dixigem	Champion	J. H. Hale
Tulip	Red Haven	Loring	Elberta
Sunhaven	Golden Jubilee	Chinese Cling	Redskin
Red Bird	Early Elberta	Early Elberta	Gage Elberta
Coronet	Hale-Haven	Belle of Georgia	Indian Blood

251—BELLE OF GEORGIA. Large creamy white, red blush, wonderful quality. Exceptionally hardy in bud and regular bearer. The preferred white **Peach**. One week before Elberta. Freestone. Very vigorous, hardy and productive.

266—REDSKIN. Cross between famous Elberta and J. H. Hale. A large yellow freestone with firm flesh and delicious sweet flavor. Combines the good qualities of both. Ripens just before Elberta. Dr. Shepard says it is the most promising new variety for Missouri. Fruit develops to large size.

Plums From NEOSHO

240—OZARK PREMIER. This outstanding cross is an extra large, bright red, delicious **Plum** which ripens August 1. Bears heavily.

See Page 41
for Plum Prices

Ozark Premier

America

Stanley Prune

235—AMERICA. Hang as thick on the limbs as they can stick! A rich flavor, good size yellow **Plum** with red cheek. Wonderful for jellies, preserves, butter, or conserves.

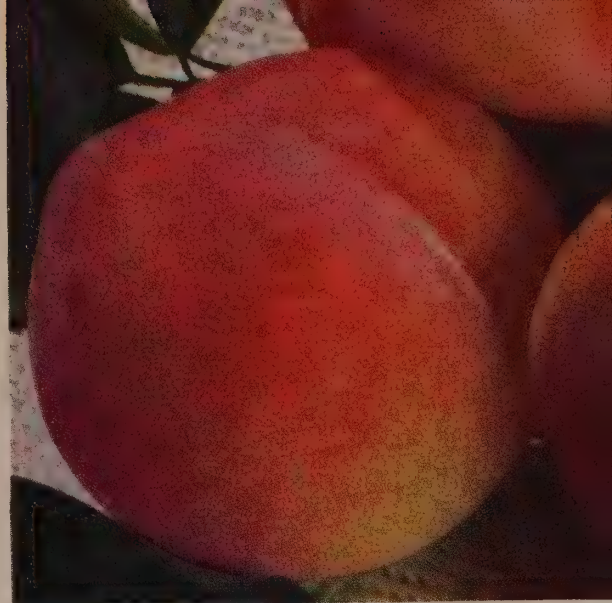

242—STANLEY PRUNE. Freestone. Best of **Prunes** because the tree is so sturdy and vigorous and thrives where other **Prunes** fail. Bears second year, produces large, beautiful, sweet, golden fleshed, purplish blue **Prunes**.

Elberta

- ✓ **253—ELBERTA.** The **Peach** everyone knows. Ripens here August 10. Good producer of high quality fruit and parent of the following.
- ✓ **254—EARLY ELBERTA.** Ripens a week ahead of regular Elberta and better in quality. Larger and more attractive, and brings better price in earlier season.
- ✓ **255—GAGE ELBERTA.** Larger, redder, and better quality than regular Elberta. It ripens a week later to extend the Elberta season. It is a lower growing tree and hardier in the bud.
- ✓ **256—JULY ELBERTA.** Three weeks ahead of Elberta and still has the quality. A beautiful yellow Freestone.

- ✓ **252—CHAMPION.** Large white **Peach** with unusual honey-sweet flavor. Ripens just before Belle of Georgia.
- ✓ **257—GOLDEN JUBILEE.** Beautiful yellow freestone, 25 days before Elberta. Good size and quality. Especially good for home and local market.
- ✓ **258—J. H. HALE.** The largest of the high quality commercial **Peaches**. Ripens August 15, just ahead of Elberta. It is the preferred **Peach** during its season. Quality unsurpassable.
- ✓ **269—SUNHAVEN.** New variety. Early bearing variety. Fruit brilliant red, with yellow flesh. Firm fruit. Is partial cling.
- ✓ **261—CHINESE CLING.** Large, round, white with juicy, firm flesh. Unusual flavor makes it ideal for canning. The best white cling.
- ✓ **262—DIXIGEM.** Early yellow **Peach**, ripening with Red Haven.
- ✓ **265—TULIP.** The best extra early, semi-freestone grown at the Missouri Fruit Experiment Station. Ripens six weeks ahead of Elberta. Fruit medium to large, nearly round with good color before picking time. Short fuzz, fine texture. Firm yellow flesh, stands shipping well.
- ✓ **267—CARDINAL.** The Hale-Haven parentage gives this **Peach** unusual flavor and quality. 6½ weeks ahead of Elberta, this yellow **Peach** with red blush has good flavor, is a firm, juicy clingstone.
- ✓ **268—CORONET.** Cross between Hale-Haven and Dixigem. Ripens a week ahead of Red Haven. Yellow with red blush.
- ✓ **259—HALE-HAVEN.** Has the quality and size of J. H. Hale and hardiness of South Haven. Two weeks ahead of Elberta. Red blush comes before ripening. Perfect for marketing. This freestone is the most popular **Peach** in the central United States.

Hale-Haven

- ✓ **263—INDIAN BLOOD.** Clingstone. Late. An old-fashioned favorite of fine flavor. Flesh is blood-red color. Wonderful for canning, pickling, and preserving.
- ✓ **250—LORING.** Another introduction by Dr. Shepard of Missouri. Resembles Golden Jubilee but is larger and ships well. Large yellow freestone with bright red blush. Two weeks ahead of Elberta. Most promising new **Peach** in years.
- ✓ **264—RED BIRD.** Large, white, early cling. Ripens about July 1. It is firm, a good shipper.
- ✓ **260—RED HAVEN.** Bright red blush. Yellow flesh ripening ahead of Golden Jubilee. A cross between Hale-Haven and Kalhaven, it is extremely popular. The quality is extra good and it is almost fuzzless.

PLUMS, APRICOTS and NECTARINE

- ✓ **236—BURBANK.** A large, cherry-red, solid meated **Plum** of rich flavor which bears well if planted along with another variety to cross pollenate.
- ✓ **239—PRESIDENT.** Freestone. Nearly as large as an Apple. An immense purplish black **Plum** of wonderful quality. Plant a Stanley with it for pollination.
- ✓ **241—SAPA.** You can be assured **Plums** the first or second year with Sapa. Juicy purplish flesh of good quality ripening in July. Bears every year.

237—BLUEFRE. Cross between Stanley and President. Very short supply. This Spring Only \$2.50 each.

Improved Superb Apricot

- ✓ **245—CHINESE APRICOT.** A very fine **Apricot**. Large size with sweet flavor. Smooth skin, pale orange color with a bright red cheek. Plant with Superb for cross pollination.
- ✓ **247—NECTARINE, SURECROP.** An old time fruit similar to both **Peach** and **Plum**. Skin like **Plum**, seed like **Peach**, flesh has some of better characteristics of both. Hardy.

NEOSHO'S FRUIT

Since our founding 50 years ago, Neosho Nurseries have specialized in **FRUIT TREES**. On our 530-acre growing grounds we propagate and raise our own trees and guarantee you the finest stock of healthy, vigorous growth. Neosho Nurseries started in business with orchard trees, and many commercial orchardists depend on us for new and improved true-to-name varieties.

294—JONAGRAM—A new introduction from the Missouri Fruit Experiment Station developed by Dr. Shepard, combines the better qualities of Jonathan and Ingram. It is larger than Jonathan with smooth, pale bright yellow skin overlaid with red. An attractive red with firm, juicy, tender flesh. Blooms late and bears fruit younger than most varieties. Ripens at Jonathan time.

273—DARK RED JONATHAN. The most popular **Apple** of the Midwest. When fully ripened its snappy flavor makes it good eating and for pies it is unbeatable. This red sport of Jonathan is a solid bright red and matures ahead of regular Jonathan.

274—GOLDEN LODI. A greatly improved Yellow Transparent. Much larger, a rich yellow, firm, thick-skinned **Apple** that ships well. Ripens first week in July and reaches market when they are anxious for early **Apples**.

JONADEL

292—JONADEL. (Jonathan X Delicious). A fine new introduction from Iowa State University similar in shape to Jonathan, but larger. Skin is smooth and firm, color cherry-red to dark red. Crisp and juicy, with milder flavor than Jonathan. Stores well from January to March, does not get mealy. Tree appears to be blight resistant.

JONADEL PRICES

7/16 in.	1.90	1.50	1.30	1.10

271—YELLOW DELICIOUS. Best yellow **Apple** on the market. Large, beautiful golden yellow. Firm flesh, stores well until late winter.

Yellow Delicious

NEOSHO CHERRIES

SWEET CHERRIES

Always plant two varieties to insure pollination. Use Van for one.

205—BING. A large, deep red, heart-shaped **Sweet Cherry**. Midseason. Has no superior for all purposes.

204—VAN. Excellent pollenizer. Large, black fruit. Virus-free and hardy.

208—SAM. Black fruit, earlier than Bing. Firm fruit, resistant to cracking.

207—LAMBERT. Bing all over again in quality and desirability, but ripens a week later and is red.

209—NAPOLEON (Royal Ann). Like Montmorency, an old favorite.

210—SENECA. Large, black **Sweet Cherry** with unusually good flavor. Ripens with Strawberries. One of the best of the new **Sweet Cherries** for Midwest.

SWEET CHERRY PRICES

Trunk Diameter	Approx. Height	Each	5 Trees Each	10 Trees Each	25 Trees Each	100 Trees Each
11/16 in.	4 ft. up	\$2.35	\$2.10	\$1.85	\$1.70	\$1.45

5/16 in.	2-2½ ft.	1.35	1.20	1.10	1.00	.90

206—BLACK TARTARIAN.

(Above). A very productive early **Sweet Cherry** of good quality which stands dry, hot weather.

APPLES

293—VANCE DELICIOUS. This fine dark red strain of Delicious comes from the Southeast Apple region. Matures a full two weeks ahead of Delicious.

281—SUMMER CHAMPION. A large, attractive red, fine quality late summer Apple which should be in every home orchard and finds a ready market at top prices.

276—DARK RED STAYMAN. The Neosho Dark Red Stayman is a marvelous improvement over many Stayman Apples; has more color and keeping qualities. It is a solid dark red. Ripens early October to 15th of October.

277—TURLEY. Too much cannot be said of this wonderful Apple of the Stayman Winesap type. Unusually fine color, shape, and uniformity. Exceptionally large, solid red, heavy producer and will not crack. Ripens September 25th to October 10th.

279—ANOKA (Old Folks Apple). So called because it often bears after second year.

283—BEACON. A top grade summer Apple ripening just after Duchess. Bright red.

280—BLACK BEN. A good red sport of the famous Ben Davis. Exceptionally hardy. Keeps into late winter.

282—DARK RED DUCHESS. A profitable summer Apple. Bears young and extra heavy. Excellent for sauce and pies.

272—GRIMES GOLDEN. An old favorite of rich golden color, fine flavor. An ideal dessert Apple, and an equally fine cooker.

288—VIRGINIA CRAB. One of the best jelly Crab Apples. Medium size, golden yellow blushed red.

296—KENT CRAB. Beautiful pink in flower and bright red fruit. Wonderful for jellies. Best new Crab for years.

297—WHITNEY CRAB. Bright red and medium size. Profuse bloom and delicious for jelly.

Dark Red Delicious

5 in 1

The Amazing
One Tree Orchard
Cat. No. 290

One tree makes an Apple orchard. Space for one full size tree is all you need to enjoy the varieties you would normally get from five. You have Apples growing in your yard all summer long. Early, midseason, late—all crisp, juicy, wonderful. Some of the finest varieties available including Yellow Delicious, Jonathan, Red Delicious, and Yellow Transparent.

295—SPARTAN. Ripens a week after McIntosh and keeps better. A new McIntosh cross—may replace parent.

298—RED WILLOW TWIG. Improved red sport of Willow Twig. A large red Apple that keeps well into May.

270—DARK RED DELICIOUS. Everyone is familiar with Red Delicious, but this is an improved sport that ripens early.

275—RED ROME. A more beautiful solid red Apple was never grown. Prolific bearer. Bears at an early age. Ripens October 1st.

285—RED WEALTHY. Widely planted late summer Apple. Bright red striped; medium to large size; ripens in August.

284—WHETSTONE (Winter Jonathan). New cross combining the qualities of Jonathan, Delicious, and Ben Davis.

WE RECOMMEND HOLLY

We are listing three of the most popular Hollies for this area. The majestic **American Holly** should be used as a specimen tree in the yard. **Roundleaf Holly** and **Burfordi Holly** can be used for front home planting or hedging your patio or terrace. All are truly unusual, beautiful plants that will enhance your home.

ROUNDLEAF HOLLY. (Below, right). Bushy, rounded shaped plant with small, oval-shaped, glossy leaves. Foliage is retained through the winter and the plant will do well in either sun or shade. Plant grows to a height and spread of about five feet. Perfect for specimen or hedge planting.

BURFORDI HOLLY. (Above). Beautiful broadleaf evergreen with shiny dark green leaves and large scarlet-red berries in the fall. Grows well in sun or shade, and is used widely as a foundation plant. **Prices left.**
